LEAD TO GROW

DEVELOP THE STUDENT & THE TEACHER

Because every school is unique—with its own challenges, strengths, and culture, helping your establishment to grow requires fresh approaches to school leadership. "Lead to Grow!"

FEB 12TH 2022

Start from
9 am - 3 pm

via Zoom

About Innovation in Education Conference

The Conference aims to explore the latest trends in education and training. Notting Hill College UK aims to address some of the common needs found in many education systems around the world. We are delighted to announce that the theme of the conference this year "Lead to Grow...Develop the Student and the Teacher" is inspired by the latest challenges thrust upon us by a world adapting to new opportunities and dangers.

The topics to be covered during the 6th Innovation in Education conference are: curriculum development, mentoring and coaching, 21st Century skills, education technology, student assessment and institutional leadership and management.

The Education in Education conference also aims to provide professional development and networking opportunities for educators, as well as seeking to actively engage the ELT community at large to look to tackle the challenges they currently face. While navigating the challenges faced and exchanging experiences and ideas, the conference aspires to provide suggested solutions and examples of best practice in applying cross curriculum teaching to primary students.

The theme of this year

The pandemic has brought about a situation where leaders in education are having to not just evolve their institutions but perform a revolution in how they deliver their services. This entails not just a systematic look at their curricula, but also at the very culture that their school embodies. The conference aims to explore the future of education.

It will also act as a platform for educational leaders to discuss current trends in education, explore the different challenges we face due to the unprecedented pace of change and use innovative digital tools in the classroom

Topics will include:

- Transformation in the classroom
- Assessment
- Education Leadership
- Curriculum
- Mentoring and coaching
- Education technology
- 21st Century Learning

Mission & vision

The conference aims to explore the concept of innovation and how it can be employed in the field of innovation to take advantage of the rapidly expanding field of opportunities available to educators and how it can all be used to help students develop and excel. This year, we aim to achieve this by highlighting the leading role of educators to develop student's 21st century skills.

Scope

The conference also puts the spotlight not only on the best practices for teachers but also on the role of the school principal, and their impact within the education system. It is vital that education keeps abreast of modern developments and challenges.

About the organisers

Notting Hill College is an accredited training provider, committed to excellence in education. We are home to a global network of students and staff, with learning centres in the UK, Turkey, UAE, Bahrain and Egypt.

Objectives:

- Develop a comprehensive vision on the concept of innovation in education
- Enhance practices aiming to promote innovation and creativity
- Identify the needs and talents of students in order to emphasise the importance of adopting curriculum and assessment tools that aim to enhance a student's analytical & critical skills.
- Integrating innovative teaching tools and training teachers on these tools in CPDs.
- Seek to provide an environment that encourages critical discussion, analysis and innovation.
- Introduce other international experiments that have applied the concepts of the discussed themes.
- The conference speakers have been specially chosen for their expertise and experience in the field of education.
